

Creamos el repositorio en github:

The image shows two screenshots from the GitHub website. The top screenshot is the 'Create a new repository' page. It has a dark theme. The title is 'Create a new repository'. Below it, a subtitle says 'A repository contains all project files, including the revision history. Already have a project repository elsewhere? [Import a repository.](#)'. There is a 'Repository template' section with a 'No template' dropdown. Below that, it says 'Start your repository with a template repository's contents.' The 'Owner *' is 'THCFree' and the 'Repository name *' is 'DAWExamenRecuperacion'. A green checkmark indicates 'DAWExamenRecuperacion is available.' There is a text input field for 'Description (optional)'. The bottom screenshot shows the repository page for 'THCFree / DAWExamenRecuperacion'. It has a dark theme. The repository is public. There are buttons for 'Pin', 'Unwatch' (1), and 'Fork' (0). There are two cards: 'Set up GitHub Copilot' and 'Invite collaborators'. Below these is a 'Quick setup' section with options for 'Set up in Desktop', 'HTTPS', and 'SSH'. The SSH URL is 'https://github.com/THCFree/DAWExamenRecuperacion.git'. Below that is a section for creating a new repository on the command line with the following commands:

```
echo "# DAWExamenRecuperacion" >> README.md
git init
git add README.md
```

Create a new repository

A repository contains all project files, including the revision history. Already have a project repository elsewhere? [Import a repository.](#)

Repository template

No template ▾

Start your repository with a template repository's contents.

Owner * Repository name *

THCFree / DAWExamenRecuperacion

✔ DAWExamenRecuperacion is available.

Great repository names are short and memorable. Need inspiration? How about [verbose-giggle?](#)

Description (optional)

THCFree / DAWExamenRecuperacion

Code Issues Pull requests Actions Projects Wiki Security Insights Settings

DAWExamenRecuperacion Public

Pin Unwatch 1 Fork 0

Set up GitHub Copilot

Use GitHub's AI pair programmer to autocomplete suggestions as you code.

Invite collaborators

Find people using their GitHub username or email address.

Quick setup — if you've done this kind of thing before

Set up in Desktop or HTTPS SSH <https://github.com/THCFree/DAWExamenRecuperacion.git>

Get started by [creating a new file](#) or [uploading an existing file](#). We recommend every repository include a [README](#), [LICENSE](#), and [.gitignore](#).

...or create a new repository on the command line

```
echo "# DAWExamenRecuperacion" >> README.md
git init
git add README.md
```

Clonamos el repositorio en la maquina local

Clone a repo with a URL

URL of the remote repo

`https://github.com/THCFree/DAWExamenRecuperacion`

Choose the location you want to clone to

`C:\Users\Delta\source\repos`

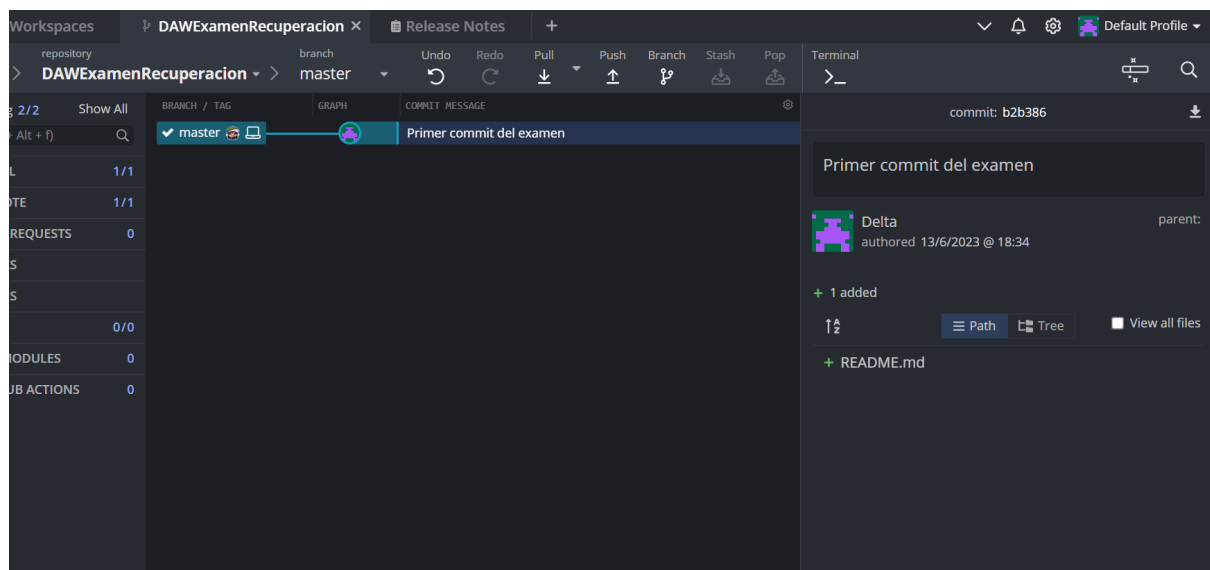

Browse

Full path

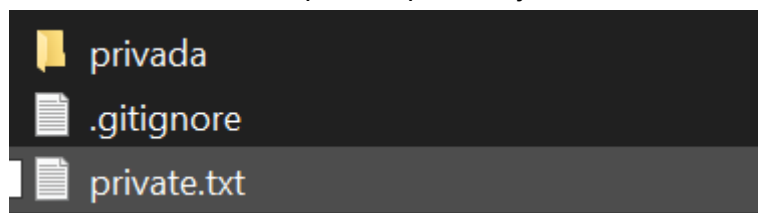

`C:\Users\Delta\source\repos\DAWExamenRecuperacion`

Clone the repo!

Y inicializamos el repositorio creando el Readme.md y hacemos push para publicar los cambios

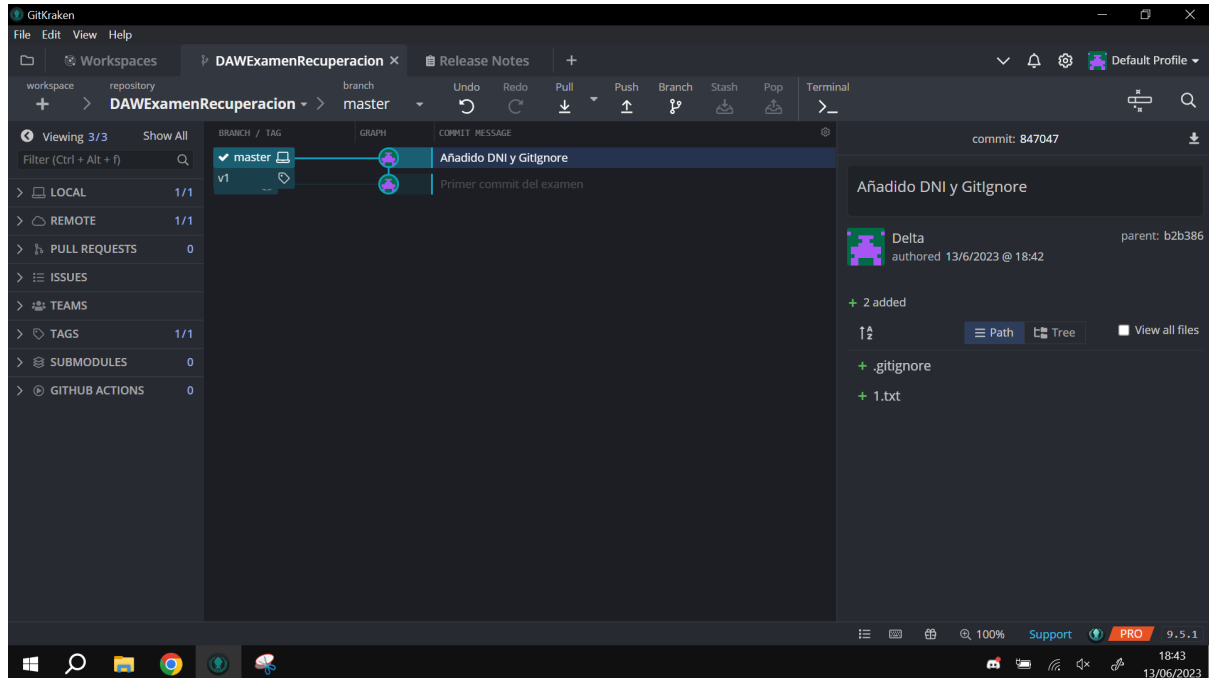

Creamos los archivos que nos pide el ejercicio

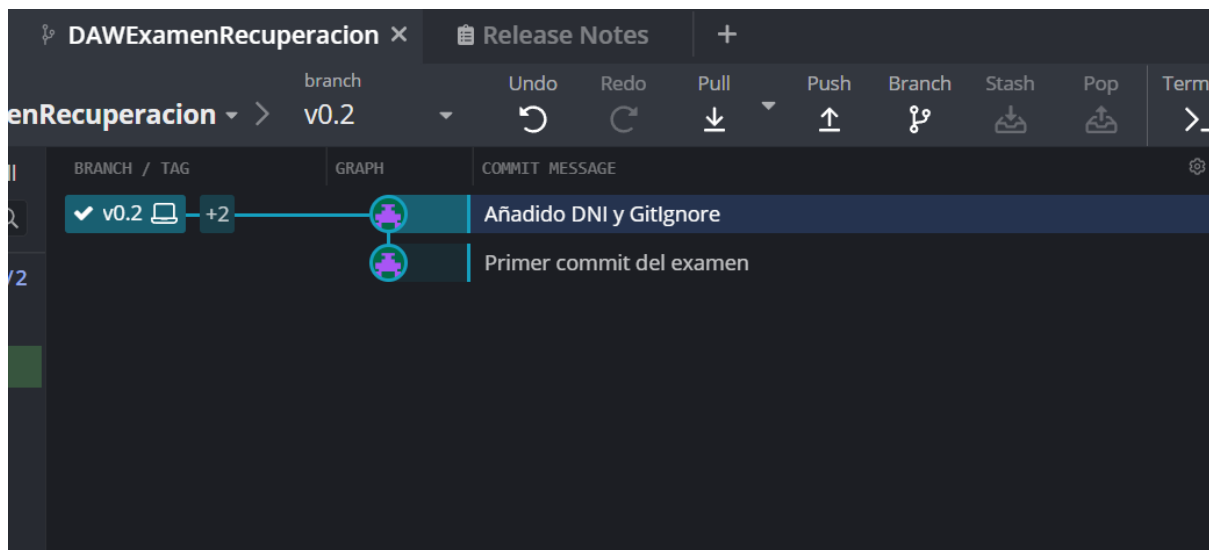

Y añadimos los necesarios a .gitignore para ignorarlos

```
private.txt|
privada/
```

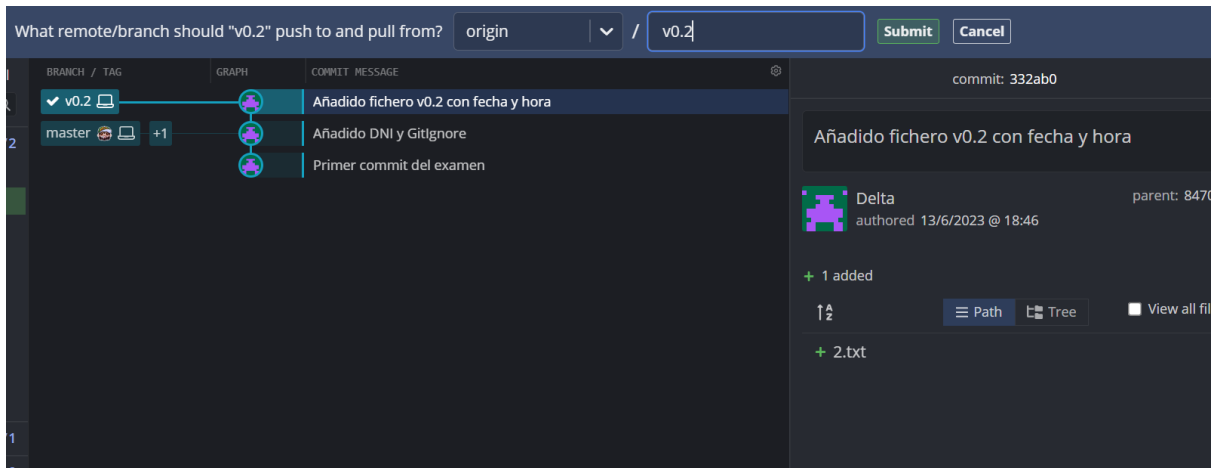

Creamos el commit y añadimos el tag v1 a el, hacemos push para subir los datos

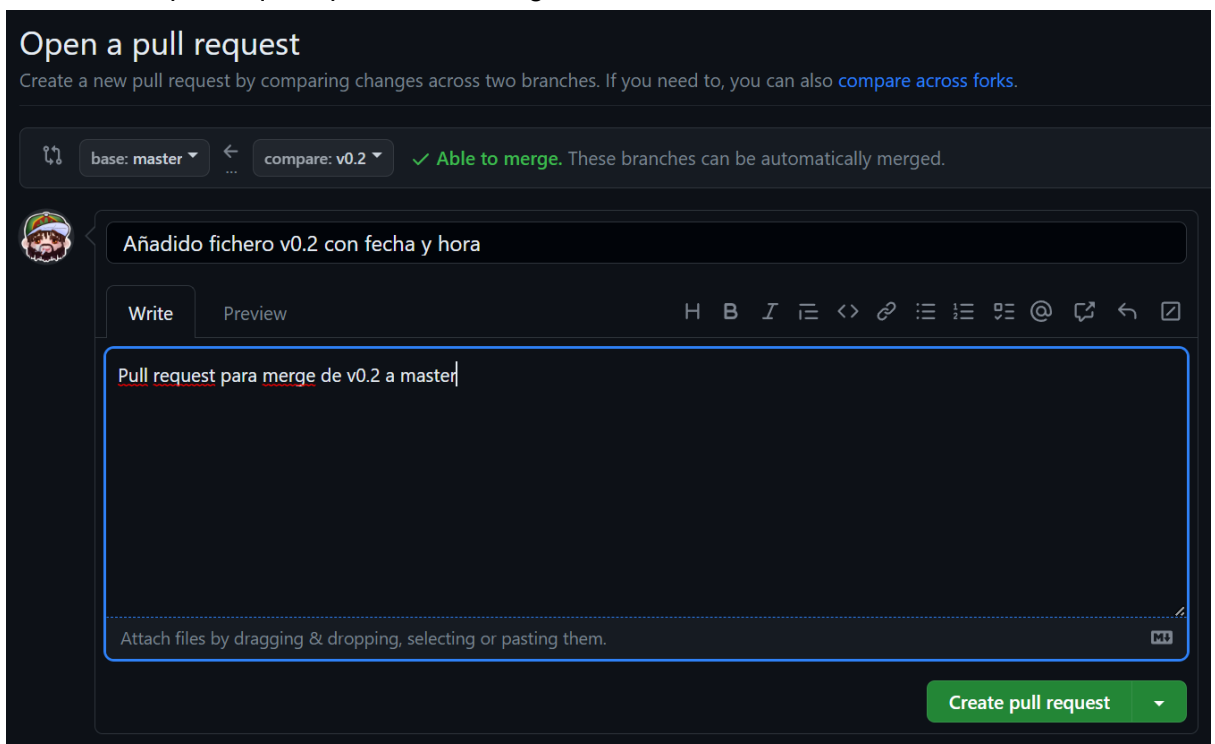

Creamos la branch v0.2

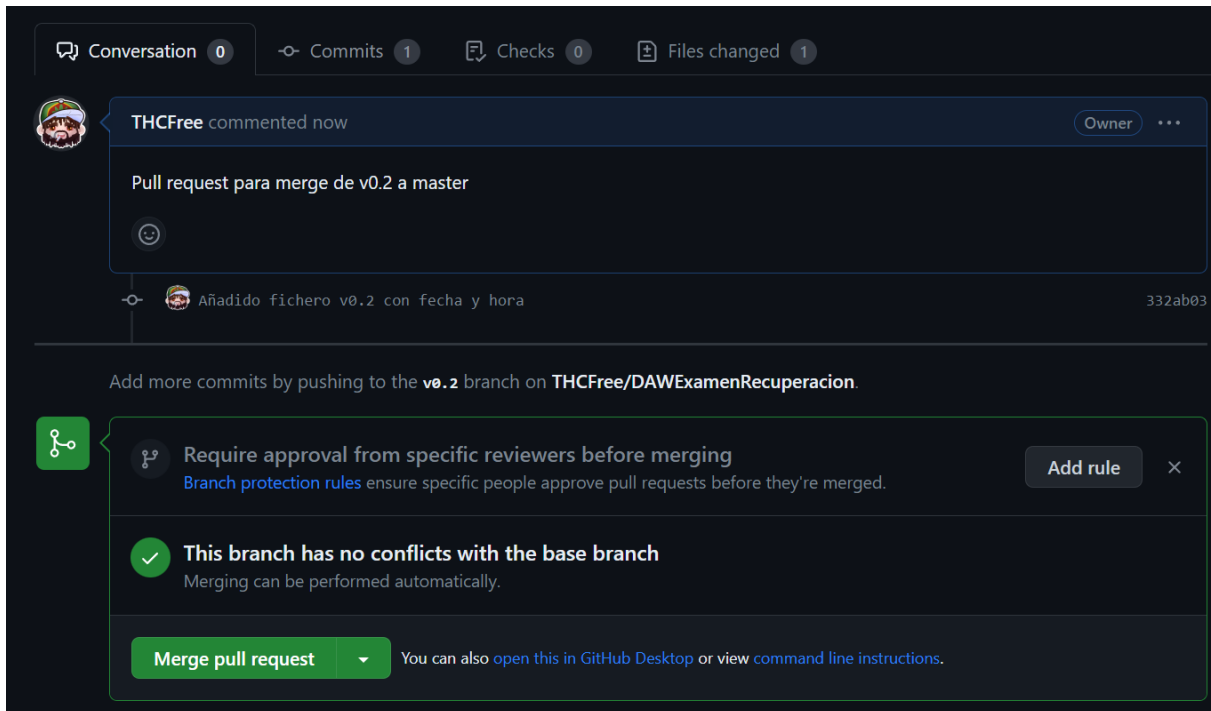

Hacemos commit y creamos la rama remota

Creamos un pull request para hacer merge de v0.2 a master

Hacemos merge a la pull request

Añadimos hola al fichero 1.txt y hacemos commit y push en master

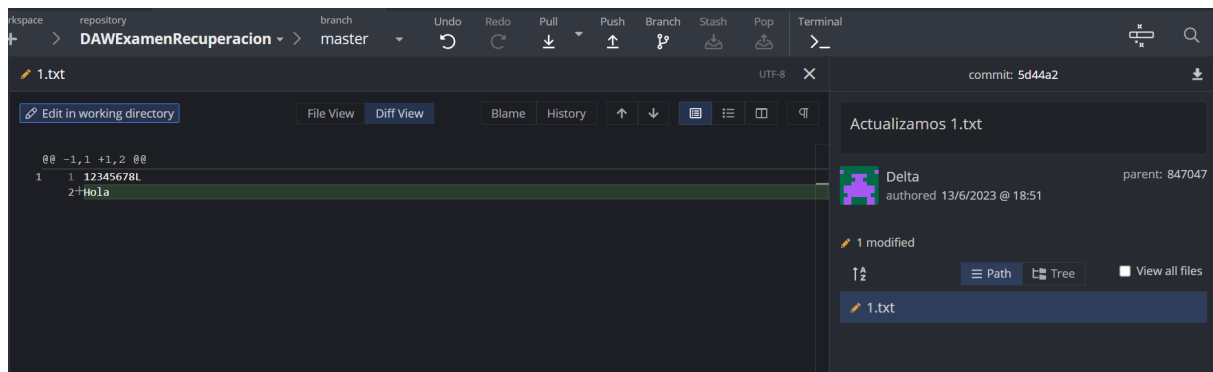

1.txt: Bloc de notas

Archivo Edición Formato Ver A

12345678L

Hola

Añadimos adios al fichero 1.txt en v0.2 y hacemos commit y push

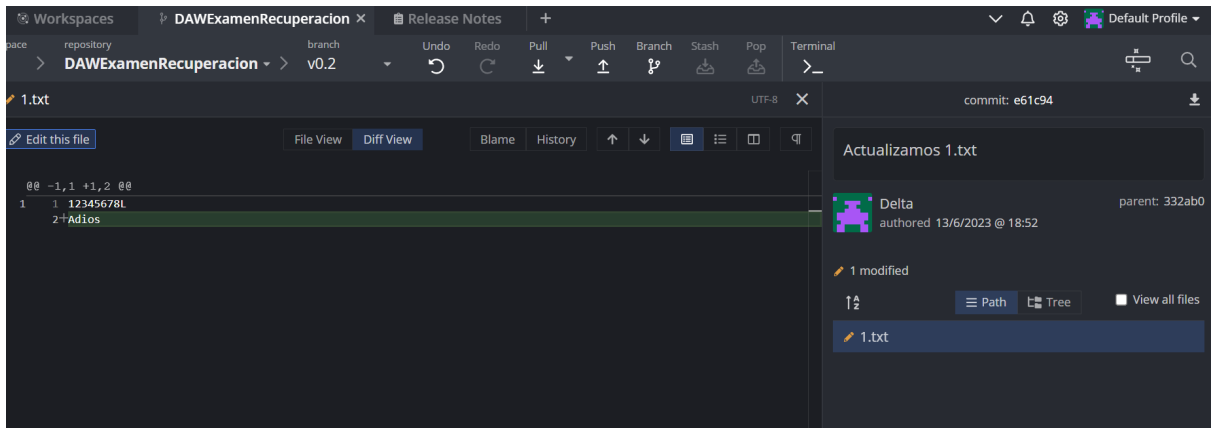

1.txt: Bloc de notas

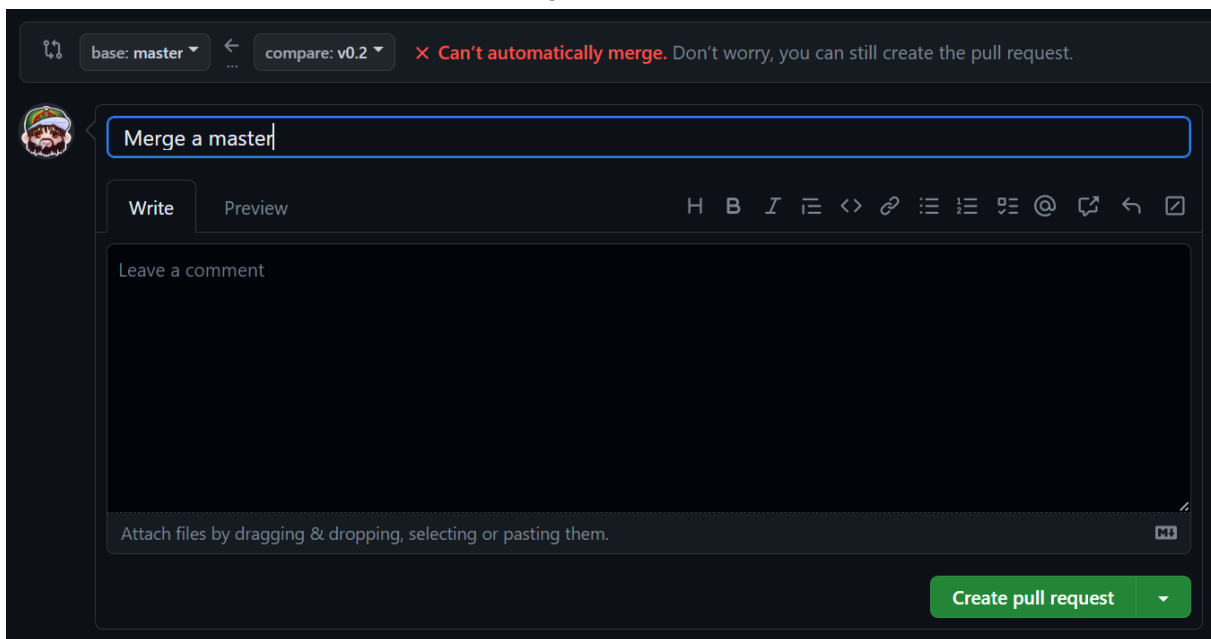

Archivo Edición Formato V

12345678L

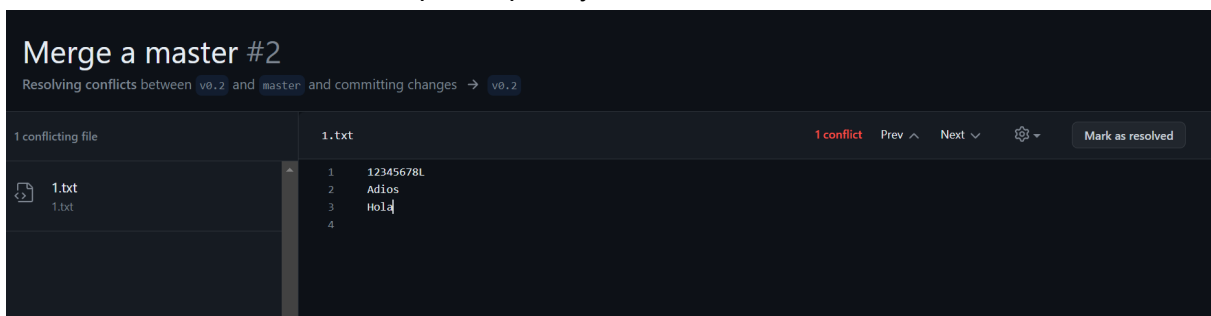

Adios

Creamos una pull request para hacer merge de las dos ramas:

Resolvemos los conflictos de la pull request y marcamos como resueltos

Procedemos con el merge

Merge a master #2

Resolving conflicts between `v0.2` and `master` and committing changes → `v0.2` Commit merge

1 conflicting file	1.txt	✓ Resolved
1.txt	<pre>1 12345678L 2 Adios 3 Hola 4</pre>	

Merge a master #2

Open THCFree wants to merge 2 commits into `master` from `v0.2`

Conversation **0** Commits **2** Checks **0** Files changed **1**

THCFree commented 3 minutes ago Owner ...

No description provided.

 Actualizamos 1.txt e61c94b

 Merge branch 'master' into v0.2 Verified b3111a1

Add more commits by pushing to the `v0.2` branch on [THCFree/DAWExamenRecuperacion](#).

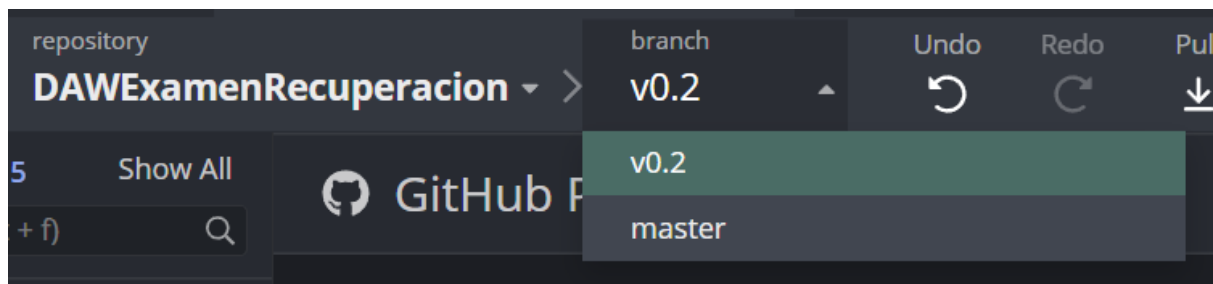

✓ **This branch has no conflicts with the base branch**
Merging can be performed automatically.

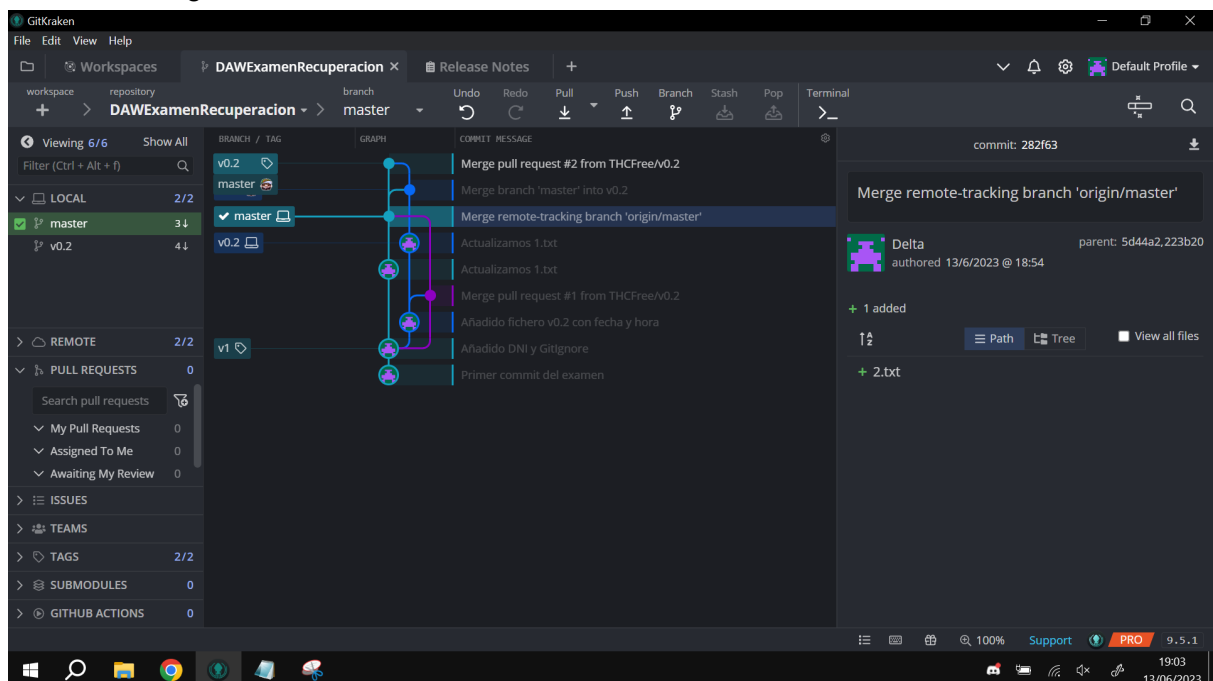

Merge pull request ▼ You can also [open this in GitHub Desktop](#) or [view command line instructions](#).

Listamos todas las ramas:

Creamos el tag v0.2

Eliminamos la rama v0.2:

File Edit View Help
